Steps on how to inject

A.K.A **DKT** Press

1 Wash hands and air dry.

7 Hold the injection by the port.

2 Ensure that the medicine is at room temperature and the following are also available:
a. Spirit/water
b. Cotton wool

8 Push the needle into the port firmly until you close the gap between the needle shield and the port.

3 Make sure you clean the injection site with methylated spirit or water and cotton wool.

9 When activated, pull the needle shield away to remove it from the needle.

4 Remove the Sayana Press injection from the pouch.

10 Gently grasp and squeeze a large area of the skin to make sure Sayana Press is inserted inside the skin.

5 Hold the Unject by the port and shake vigorously for 30 seconds.

11 Hold the Sayana Press by the reservoir and slowly press for 5 - 7 seconds. When the reservoir is empty, slowly pull the needle out of the skin, and clean the skin with a cotton wool. Do not massage.

6 Check to make sure the solution is mixed and there is no leakage.

12 After administration of the dose, dispose off the used injector in a safe and proper manner. Do not recap

Implanon NXT®

68 mg etonogestrel
Contraceptive implant

3 Years Pregnancy Prevention

- Implanon NXT has an innovative applicator that prevents the rod from falling out and makes insertion easy
- The rod contains a radiopaque barium sulfate which allows it to be detected using xray, if needed.
- The radiopaque implant is designed with a rate controlling membrane that provides continuous release of etonogestrel over a period of 3 years.

Implanon NXT can be used by a wide range of women including

- Single or married women
- Breastfeeding mothers (from 6 weeks)
- Women who want convenient, long-term contraception

Benefits of Implanon NXT

- It prevents pregnancy for up to 3 years but can be removed any time before the due date.
- It is discreet and can be used privately.
- More than 99% effective.
- It starts working immediately if inserted during menstrual period
- It avoids the stress of keeping up with a daily, weekly or monthly routine contraceptive.

Take a 3 year holiday from baby making

use LEVOPLANT

ABOUT LEVOPLANT

- ⊙ Each rod contains Levonorgestrel 75mg.
- ⊙ Releases a low daily dose and is quickly reversible.
- ⊙ Long lasting- for 3 years.
- ⊙ Comes with a disposable inserter for easy and quick insertion.
- ⊙ Suitable for a broad range of women-including breastfeeding moms (from 6 weeks).

lydia™

INTRAUTERINE
CONTRACEPTIVE
DEVICE

There is a Lydia IUD
for every woman

Key advantages of Lydia IUDs

- ✔ High efficacy 99.2%
- ✔ Long term contraception up to 10 years.
- ✔ No hormones, so no hormonal side effects.
- ✔ Quickly reversible so you can get pregnant immediately it is removed.
- ✔ Works as emergency contraceptive, if inserted within 5 days of having unprotected sex.
- ✔ Does not interfere with sex.
- ✔ Cost effective for a long time.
- ✔ Moisture resistant packaging, to protect the copper parts.
- ✔ Nylon thread is soft, which means it won't be felt during sex.
- ✔ Calibrated insertion tube for provider accuracy and convenience.

Healthy, happy
women...

Lydia™ Copper T

- ✓ Up to 10 years of pregnancy prevention.
- ✓ One of the safest methods of contraception.
- ✓ Good choice for women who should not use hormones.
- ✓ Economical.
- ✓ Complete freedom from constant follow up.

Lydia™ Safe Load

- ✓ With Lydia Safe Load, provider can load the IUD inside the tube in 10 seconds.
- ✓ It perfectly folds the arms of the IUD into the insertion tube.
- ✓ Prevents infection, by ensuring the provider does not touch the IUD throughout loading and insertion.
- ✓ Lydia Safe Load gives up to 10 years of pregnancy prevention.

Healthy, happy
women...

lydia™ Copper Y

- ✓ It provides long term protection of up to 5 years.
- ✓ Flexible Y-shape offers perfect placement in the womb.
- ✓ The special Y-shape has a better uterine fit thus low expulsion rate.
- ✓ It requires only 1/3rd dilation of the cervix compared to copper T.
- ✓ During insertion and removal, it is less painful for the woman compared to Copper T.
- ✓ Comes with a free, disposable uterine sound.

lydia™ Sleek

- ✓ Effective for up to 5 years.
- ✓ The only small sized IUD available in Nigeria, that fits endometrial length between 5-8cm.
- ✓ Perfect fit for women with small uterus such as nulliparous women (women who have not given birth).
- ✓ The only ready-to-insert IUD in Nigeria- no loading required.
- ✓ Its geometric design has a better uterine fit in small uterus and this gives low expulsion rate.
- ✓ Has been used by many gynaecologists in the treatment of Asherman's syndrome.

Introducing:

lydia™

Post-Partum IUD

- ✔ It is inserted within 48 hours after delivery and this saves the time of the provider and client.
- ✔ Has low risk of uterine perforation because of the thick wall of the recently pregnant uterus.
- ✔ Patient will not notice pain or cramping during insertion.
- ✔ Special insertion tube to ensure the IUD reaches the fundus and does not get expelled.
- ✔ The woman has an effective method of contraception before she is discharged from the hospital.
- ✔ It does not affect breast milk supply in any way.
- ✔ The nylon thread length has been increased, so that some part of the thread is visible after the IUD is placed in the enlarged uterus.
- ✔ Gives up to 10 years of pregnancy prevention

eloira

Hormonal Intrauterine System
Levonorgestrel 52 mg.

Eloira is an effective treatment for abnormal, heavy uterine bleeding.

Eloira releases a small daily dose of 20mcg of Levonorgestrel, over a period of 24 hours for up to 5 years, thereby ensuring an optimum supply of Levonorgestrel in the uterus

Eloira is an effective treatment for:

- ✓ Dysfunctional Uterine Bleeding
- ✓ Menorrhagia,
- ✓ Endometriosis
- ✓ Adenomyosis
- ✓ Fibroids

Eloira also provides 5 years pregnancy prevention

Eloira - The right solution for menstrual disorders.....

Miso-Fem[®]

Misoprostol 200 mcg

A solution for reducing maternal mortality in Nigeria.

Each tablet of Miso-Fem contains misoprostol 200mcg

- Miso-Fem is of high quality, highly effective, widely available and affordable.
- Miso-Fem is sold in convenient packs of 4 tablets and 12 tablets.
- 4 tablets pack is suitable for Postpartum haemorrhage and Cervical ripening.
- 12 tablets pack is suitable for managing miscarriage, Post Abortion Care (PAC) & prevention and treatment of ulcer.

INDICATION	DOSE AND ROUTE
4 TABLETS PACK	
Postpartum Haemorrhage prevention	600mcg orally immediately after delivery of all foetuses (if multiple birth)
Postpartum Haemorrhage treatment	800mcg sublingually or 1000mcg rectally
Cervical ripening prior to uterine instrumentation	400mcg vaginally 3 hours before uterine procedure
12 TABLETS PACK	
Miscarriage at less than 12 weeks	800mcg either sublingually, buccally or vaginally every 6 hours up to a maximum of 3 doses
Miscarriage at 12-24 weeks	400mcg either sublingually, buccally or vaginally every 3 hours up to a maximum of 5 doses. Medical supervision required
*Missed Abortion at less than 12 weeks	800mcg vaginally or 600mcg sublingually every 3 hours maximum of 2 doses
**Incomplete Abortion at less than 12 weeks	600mcg orally or 400mcg sublingually
Prophylaxis of NSAID induced peptic ulcer	200mcg orally two to four times daily
Treatment of NSAID-induced peptic ulcer	800mcg orally daily taken in 2-4 divided doses with each main meal for 4-8 weeks

* Missed abortion occurs when the woman's body does not recognise foetal death, thus she has no signs or symptoms.

** Incomplete abortion occurs when there is partial expulsion of the foetus and this may be life-threatening if untreated.

Mifepak

Combipack of Mifepristone 200mg tablet and Misoprostol 200mcg tablets

A WHO recommended intervention to prevent unsafe abortion

Mifepak is a combipack containing 1 tablet of **Mifepristone 200mg** and 4 Tablets of **Misoprostol 200mcg**. It is indicated for Post-Abortion Care (PAC).

Dosage:

Step 1: Administer 1 tablet of Mifepristone 200mg orally

Step 2: After 24 hours, administer 4 tablets of Misoprostol 200mcg either vaginally, sublingually or buccally

Why Mifepak

- ✔ Mifepak is not invasive and yet it ensures complete uterine evacuation.
- ✔ Mifepak is safe and well tolerated.
- ✔ Mifepak ensures privacy as it does not require hospitalization.
- ✔ The dosage of Mifepak is simple and straight forward.

NB: Sold to registered health providers only.
